

Asad Naeem

+92-300-2551655 | asadnaeem0255@gmail.com | Lahore, Pakistan

PROFESSIONAL SUMMARY

Computer Science graduate with hands-on experience in software development, database management, web application development, and MERN Stack (MongoDB, Express.js, React.js, and Node.js) development. Strong understanding of Software Engineering concepts, Object-Oriented Programming, Data Structures, APIs, SQL, and troubleshooting techniques. Skilled at analyzing problems, writing clean and maintainable code, learning new technologies quickly, and collaborating effectively to develop reliable, efficient, and user-focused software solutions.

EDUCATION

COMSATS University Islamabad

Bachelor of Science in Computer Science

Sep 2022 – June 2026

PROJECTS

Counsel-X — Full-Stack Counseling Platform

MERN Stack Project

React.js, Node.js, Express.js, MongoDB, Redis, Zod

FYP Project

- Designed and implemented a scalable, multi-role counseling platform featuring comprehensive dashboards for Students, Counselors, and Administrators.
- Built a robust backend architecture using Node.js and Express.js, leveraging MongoDB for persistent data modeling and Redis for session management and optimized performance.
- Implemented strict data integrity layers across both client and server using Zod validation schemas for secure authentication, scheduling, and user profiles.
- Integrated real-time communications workflows including live chat routing, automated email notifications via Nodemailer, and video calling capabilities.

Online Paper Submission System

Web Application

React.js, Node.js, Express.js, MongoDB

Academic Project

- Developed a full-stack web application for online paper submission and management for academic conferences
- Implemented role-based system for authors, reviewers, and administrators with secure access control
- Built RESTful APIs using Node.js and Express.js for handling submissions and review workflows
- Designed MongoDB database for storing users, papers, reviews, and submission records efficiently
- Enabled features such as paper upload, status tracking, and review feedback system

Event Registration System

Web Application

React.js, Node.js, Express.js, MongoDB, JWT

Academic Project

- Built a full-stack event management system for user registration and event handling
- Implemented JWT authentication with protected routes and basic role-based access
- Created RESTful APIs using Node.js and Express.js for events and users
- Designed MongoDB database using Mongoose for storing users and event data
- Implemented CRUD operations for creating, updating, and deleting events
- Connected React.js frontend with backend APIs for smooth user experience

TECHNICAL SKILLS

Programming Languages: Python, C++, JavaScript

Web Development: HTML, CSS, JavaScript, React.js, Node.js, Express.js, JWT Authentication, RBAC, MVC Architecture

Database Technologies: MongoDB, MySQL, PostgreSQL

Software Engineering: OOP, Data Structures, APIs, Operating Systems, Software Engineering Concepts, Debugging and Testing

Tools & Platforms: Git, GitHub, Visual Studio Code, Linux, Postman, Jira, Slack, Agile/Scrum

SOFT SKILLS

Professional Skills: Communication, Problem Solving, Analytical Thinking, Ownership, Team Collaboration, Adaptability, Time Management, Attention to Detail, Critical Thinking, Client Conversation

LANGUAGES

English: Professional Proficiency

Urdu: Native Proficiency
